Jeremy Clarkson invites us to Motorworld, his take on different cultures and the cars that they drive. There are ways and means of getting about that don't involve four wheels, but in this slice of vintage Clarkson, Jeremy isn't much interested in them. Back in 1996, he took himself off to twelve countries (okay, eleven - he goes to America twice) in search of the

hows, whys and wherefores of different nationalities and their relationships with cars. There were a few questions he needed answers to: * Why, for instance, is it that Italians are more interested in looking good than looking where they are going? * Why do Indians crash a lot? * How can an Arab describe himself as 'not a rich man' with four of the world's most expensive cars in his drive? * And why have the otherwise neutral Swiss declared war on the car? From Cuba to Iceland, Australia to Vietnam, Japan to Texas, Jeremy Clarkson tells us of his adventures on and off four wheels as he seeks to discover just what it is that makes our motorworld tick over. _____ Praise for Jeremy Clarkson: 'Brilliant . . . laugh-out-loud' Daily Telegraph 'Outrageously funny . . . will have you in stitches' Time Out 'Very funny . . . I cracked up laughing on the tube' Evening Standard

DIVin American Motors Corporation: The Rise and Fall of America's Last Independent Automaker, author Patrick Foster provides the ultimate inside look into an American corporation that rose from the death throes of a once-thriving independent auto industry, putting up a valiant fight for nearly half a century before succumbing to the inexorable will of the corporate machine. Born from the ashes of Hudson and Nash, AMC represented a last, desperate attempt at survival for an independent automobile company. Thanks to the steady, capable leadership of George Romney, the company not only survived, but thrived, riding on the success of the firm's small, economical cars like the Rambler. But when competition arose from Ford, Plymouth, and Chevrolet and the market began to shift toward performance and luxury cars, AMC found itself poorly prepared to compete with its bigger rivals. With the fuel crisis of the 1970s, the small cars from AMC once again refilled corporate coffers, and the firm's purchase of the Jeep brand also generated profits—but ultimately, it was too little, too late. Even a partnership with French automaker Renault and the introduction of all-wheel-drive cars couldn't save AMC. In 1987, Chrysler Corporation purchased AMC and the story of the last independent automaker came to an end. This engaging book, from one of America's best-known automotive writers, tells the entire AMC story from its inception to its ultimate demise. /div

From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in Riding the Roller Coaster, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler—its products, people, and performance over time—with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders—including Chrysler himself and Lee Iacocca—emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.
