The textile industry in China is the largest in the world in both overall production and exports. China exported \$274 billion in textiles in 2013, a volume that was nearly seven times that of Bangladesh, the second largest exporter with \$40 billion in exports. This accounted for

43.1% of global clothing exports. The industry began to grow at the turn of the 20th century, until the production ...

Priest, Alan and Pauline Simmons (1934) This title is out of print. An excellent introduction to the study of Chinese textiles, this volume was originally written as a handbook to accompany a special exhibit of Chinese court robes and accessories presented by the Museum in December, 1931. In addition to providing an historical background information essential to understanding these beautiful objects, specific examples from the Met's collection are discussed in detail.
