Il crudo realismo, l'insistente accento sull'uomo e sui suoi stati d'animo, sull'attualità contemporanea, ma anche l'alto grado di consapevole artificio pervade tutta la letteratura dell'Africa "indigena" - quella cioè dei Boscimani e degli Ottenotti e dei Pigmei. Paul Radin, nella sua ricca e preziosa raccolta, seleziona le fiabe e i racconti più rappresentativi di questa letteratura popolare, unica per il tipo d'intreccio, per i contenuti specifici e per gli espedienti letterari cui ricorre - come la funzione dei canti nel contesto prosaico, la frequenza dei finali moralistici, la riconoscibile prevalenza delle spiegazioni etologiche. La cruda difficoltà di vivere, la furbizia quale stratagemma per la sopravvivenza e anche i temi morali quali l'innocenza e lo spirito d'indipendenza trovano largo spazio nel favoleggiare africano: da Le avventure di Mri1e a Com'è venuta la prima pioggia - forse la fiaba più bella - il lettore stesso riconoscerà e saprà apprezzare i tratti distintivi e lo stile dei popoli africani.

In an age when computers process immense amounts of information by the manipulation of sequences of 1s and 0s, it remains a frustrating mystery how prehistoric Inka recordkeepers encoded a tremendous variety and quantity of data using only knotted and dyed strings. Yet the comparison between computers and khipu may hold an important clue to deciphering the Inka records. In this book, Gary Urton sets forth a pathbreaking theory that the manipulation of fibers in the construction of khipu created physical features that constitute binary-coded sequences which store units of information in a system of binary recordkeeping that was used throughout the Inka empire. Urton begins his theory with the making of khipu, showing how at each step of the process binary, either/or choices were made. He then investigates the symbolic components of the binary coding system, the amount of information that could have been encoded, procedures that may have been used for reading the khipu, the nature of the khipu signs, and, finally, the nature of the khipu recording system itself-emphasizing relations of markedness and semantic coupling. This research constitutes a major step forward in building a unified theory of the Khipu system of information storage and communication based on the sum total of construction features making up these extraordinary objects.

Above Misminay, the sky also is so divided by the alternation of the two axes of the Milky Way passing through the zenith. This mirror-image quadri-partition of terrestrial and celestial spheres is such that a point within one of the quarters of the earth is related to a point within the corresponding celestial quarter. The transition between the earth and the sky occurs at the horizon, where sacred mountains are related to topographic and celestial features. Based on fieldwork in Misminay, Peru, Gary Urton details a cosmology in which the Milky Way is central. This is the first study that provides a description and analysis of the astronomical and cosmological system in a contemporary community in the Americas. Separate chapters take up the sun, the moon, meteorological phenomena, the stars, and the planets. Star-to-star constellations, the "animal" dark-cloud constellations that cut through the Milky Way, and certain twilight- and midnight-zenith stars are analyzed in terms of their spatial and temporal integration within an indigenous cosmological framework. Urton breaks new ground by demonstrating the indigenous merging of such forms of "precise knowledge" as astronomy, meteorology, agriculture, and the correlation of astronomical and biological cycles within a single calendar system. More than sixty diagrams clarify this Quechua system of astronomy and relate it to more familiar principles of Western astronomy and cosmology.

For fans of Elena Ferrante's Neapolitan series comes a captivating family saga focused on a willful young woman's struggles against her oppressive small town by acclaimed Italian author Rosa Ventrella. In old Bari, everyone knows Maria De Santis as "Malacarne," the bad seed. Nicknamed for her dark features, volcanic temperament, and resistance to rules, the headstrong girl can only imagine the possibilities that lie outside her poverty-stricken neighborhood. Growing up with her mother, two brothers, and a tyrannical father, Maria must abide. She does--amid the squalid life to which she was born, the cruelties of her small-minded neighbors, and violence in a constant threat of eruption. As she reconciles her need for escape with the allegiance she feels toward her family, Maria has her salvations: her secret friend, Michele, son of a rival family and every bit the outsider she is, and her passion for books, which may someday take her far, far away. In this exquisitely rendered and sensory-rich novel, Rosa Ventrella explores the limits of loyalty, the redeeming power of friendship and love, and the fire in the soul of one woman who was born to break free.

A survey of the entire field of America folklore-folkways jests, boasts, tall tales, ballads, and legendary heroes--from the era of colonization to the present age of mass culture.
