You can change that CSS through JavaScript like this (mind your prefixes): element.style.webkitAnimationPlayState = "paused"; element.style.webkitAnimationPlayState = "running"; However, when a CSS animation is paused using animation-play-state, the element is prevented from transforming the same way it is when an animation is running. You can't pause it, transform it, resume it, and expect it to run fluidly from the new transformed state.

Controlling CSS Animations and Transitions with JavaScript ...

In keyframe CSS markup, I put the CSS so that all divs animate from a scale from 0 to 1.6. After that, I provided translate value from 0 to -250px to Y direction and rotated animation from 50deg to 360deg. To create the animation effect, you need to create two separate files of HTML and CSS.

Animated Background with Pure CSS and Html

Cesar C's animation style includes changing and circulating border colors created entirely with CSS. For eyes, it is hard to say whether it is colors that are circuiting around the border of alphabets or if its some tiny bugs chasing each other in a race. Nevertheless, the creator has created a simple sort of illusion with this design.
