American Government: In the United States, the government gets its power to govern from the people. We have a government of the people, by the people, and for the people. Citizens in the United States shape their government and its policies, so they must learn about important public issues and get involved in their communities. Learning about American government helps you understand your rights and responsibilities and allows you to fully participate in the American political process. The Founders of this country decided that the United States should be a representative democracy. They wanted a nation ruled by laws, not by men. In a representative democracy, the people choose officials to

In this surprising and highly unconventional work, Harvard law professor Mark Tushnet poses a seemingly simple question that yields a thoroughly unexpected answer. The Constitution matters, he argues, not because it structures our government but because it structures our politics. He maintains that politicians and political parties—not

Supreme Court decisions are the true engines of constitutional change in our system. This message will empower all citizens who use direct political action to define and protect our rights and liberties as Americans. Unlike legal scholars who consider the Constitution only as a blueprint for American democracy, Tushnet focuses on the ways it serves as a framework for political debate. Each branch of government draws substantive inspiration and procedural structure from the Constitution but can effect change only when there is the political will to carry it out. Tushnet's political understanding of the Constitution therefore does not demand that citizens pore over the specifics of each Supreme Court decision in order to improve our nation. Instead, by providing key facts about Congress, the president, and the nature of the current constitutional regime, his book reveals not

Media restrictions on American civil liberties, and the complacency of those who see these same policies as entirely reasonable accommodations to the new realities of national security. Whatever their contributions to the public discussion and policy-making processes, these voices contribute little to an understanding of the real constitutional issues raised by war. Providing the historical and legal context needed to assess competing claims, *The Constitution in Wartime* identifies and explains the complexities of the important constitutional issues brought to the fore by wartime actions and policies. Twelve prominent legal scholars and political scientists combine broad overviews of U.S. history and contemporary policy with detailed yet accessible analyses of legal issues of pressing concern today. Some of the essays are broad in scope, reflecting on national character, patriotism, and political

theory; exploring whether war and republican government are compatible; and considering in what sense we can be said to be in wartime circumstances today. Others are more specific, examining the roles of Congress, the presidency, the courts, and the international legal community. Throughout the collection, balanced, unbiased analysis leads to some surprising conclusions, one of which is that wartime conditions have sometimes increased, rather than curtailed, civil rights and civil liberties. For instance, during the cold war, government officials regarded measures aimed at expanding African Americans' freedom at home as crucial to improving America's image abroad.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also

With this platform, we the Republican Party reaffirm the principles that unite us in a common purpose. We believe in American exceptionalism. We believe America is exceptional because of our historic role - first as refuge, then as defender, and now as exemplar of liberty for the world to see. We believe our constitutional system - limited government, separation of powers, federalism, and the rights of the people - must be preserved uncompromised for future generations. We believe political

freedom and economic freedom are indivisible. When political freedom and economic freedom are separated - both are in peril; when united, they are invincible. We believe that people are the ultimate resource - and that the people, not the government, are the best stewards of our country's God-given natural resources. As Americans and as Republicans we wish for peace - so we insist on strength. We will make America safe. We seek friendship with all peoples and all nations, but we recognize and are prepared to deal with evil in the world. Based on these principles, this platform is an invitation and a roadmap. It invites every American to join us and shows the path to a stronger, safer, and more prosperous America.
