Aqua Lung is the name that first introduced
the world to Scuba diving in 1943 when
Jacques-Yves Cousteau and Émile Gagnan
developed the first "Aqua-Lung." The
excitement and adventurous spirit of that
first dive continues today and is reflected
in Aqua Lung's dedication to quality and
innovation in the manufacturing of the
world's best professional and recreational
scuba diving equipment.

1-1.1 Purpose. This chapter provides a
general history of the development of
military diving operations. 1-1.2 Scope. This
chapter outlines the hard work and dedication
of a number of individuals who were pioneers
in the development of diving technology. As
with any endeavor, it is important to build
on the discoveries of our predecessors and
not repeat mistakes of the past. 1-1.3 Role
of the U.S. Navy. The U.S. Navy is a leader
in the development of modern diving and
underwater operations. The general
requirements of national defense and the
specific requirements of underwater

reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.
