Queen Elizabeth 2 is probably the most famous liner in the world and was one of the last great transatlantic liners. QE2 - as she is more commonly known - was a global ambassador for both Cunard and Britain. She sailed nearly 6 million miles and carried 2½ million passengers in style, comfort and luxury. QE2 was launched in 1967 and made her maiden voyage from Southampton to New York on 2 May 1969. During almost 40 years of service QE2 undertook regular world cruises and latterly operated mainly as a cruise ship, sailing out of Southampton. At 70,327 tons and 963ft long with a top speed of 32 1/2 kts, she is also one of the fastest and grandest passenger vessels ever built. In 2008 QE2 was sold by Cunard to Istithmar (the investment arm of Dubai World) for conversion to a floating hotel. However, the fulfilment of this plan and indeed the future of the liner is now uncertain owing to the world economic situation.

This new edition of a comprehensive reference guide to the legendary transatlantic liner is written by her captain and includes a complete history as well as information about the recent refit and many color

2008. Following her retirement from cruising, she is now owned by Istithmar (the investment company of Dubai World). She was designed primarily to run a transatlantic service from her home port of Southampton, England, to New York, USA, and was named after the earlier Cunard liner RMS Queen Elizabeth (see Name section). She served as the flagship of the line from 1969 until succeeded by RMS Queen Mary 2 in 2004. Designed in Cunard's then headquarters and regional offices in Liverpool and Southampton respectively, and built in Clydebank, Scotland, she was considered the last of the great transatlantic ocean liners until the construction of the QM2 was announced. Before she was refitted with a diesel power plant in 1986/87, QE2 was also the last oil fired passenger steamship to cross the Atlantic in scheduled liner service. During almost forty years of service, the QE2 undertook regular world cruises and latterly operated predominantly as a cruise ship, sailing out of Southampton, England. QE2 had no identical sister ship or running mate and never ran a...

Her Royal Highness Queen Elizabeth II has reigned for 64 years, longer than any British monarch in history. During that time the Queen has endured the ups and downs that long life will bring. She was a beacon of hope during and after the Second World War in difficult times when the world faced a precarious future, and she has

served as a role model for generations of men and women who continue to be in awe of her commitment to service, sacrifice, and the Commonwealth of nations over which she rules. The abdication of her uncle, Edward VIII, in 1936 turned her family's world upside-down. When her father was crowned King George VI, Elizabeth was thrust into the eye of the storm as a future queen. A shy and reserved child, she grew into a wise and insightful monarch who has dealt ably with nine British Prime Ministers during her long reign, from Winston Churchill to Theresa May. It was, of course, not always straightforward and the Queen has found herself in hot water several times, most notably during the marriage of Prince Charles and Diana, Princess of Wales. When Diana was tragically killed in a car crash the standing of the Royal Family was probably at its lowest ebb. It is unlikely that we will ever see a monarch reign so long or so effectively again, holding together a disparate group of nations, each with its own aspirations, customs and traditions. Catherine Ryan has written an intriguing biography of one of the most famous women of modern times, who at 91 years old still seems fit and healthy and looks very unlikely to hand over the reins to her successors any time soon.

The 1960s were, it was believed, the end of the era of transatlantic liners. Grand, graceful but aging luxury ships such as the 'Queen

Mary' and 'Queen Elizabeth' were surpassed and outmoded by the new age of jet aircraft. By 1963, airlines had secured over 95 percent of all transatlantic travellers. But looking to the future, the historic Cunard Line believed that there was room for one more, last Atlantic super ship. Thus, came the ship which became the most successful super liner of all time, the 'Queen Elizabeth 2'. Fondly known as the 'QE2', she was launched and named by HM the Queen in 1967, entered service two years later and went on to sail for 39 years. She now resides in a museum & hotel like role out of Dubai. The 'QE2' is a lasting and fitting tribute to Cunard, to British shipping, to all ocean liners. This book has been created on the occasion of the 50th anniversary of the ship's maiden crossing (in May 1969) from Southampton to New York. A maritime icon, she well deserves yet another tribute!
