## **Multiplication Bar Model Worksheets - Kiddy Math**

Bar Models can be used to solve different kinds of multiplication and division word problems. In Grade 2 and early in Grade 3, students learned to use bar models to solve two-step problems involving addition and subtraction. This is extended in this chapter to include multiplication and division. Both multiplication and division are based on the concept of equal groups, or the part-part-whole concept, where each equal group is one part of the whole.

often used to solve number problems with the four operations - addition and subtraction, multiplication and division.

## **How to Teach the Bar Model: Word Problems**

Aidan Severs. Bar Modelling your way through multi-step word problems is the latest silver bullet in primary school maths for good reason. Here I look at how you can use the bar model to solve the sorts of Year 6 word problems pupils will face in their KS2 SATs. The 2014 national curriculum and new KS2 SATs, despite initial unhappiness, has achieved what is, in many ways, a positive

outlined below is represented with double sided counters. These can be used as an alternative representation to drawing a bar.

## **The Bar Model | NCETM**

Bar models help us to attain an understanding of how a problem needs to be solved and calculated. Here, for instance, one rectangle or box of the bar model represents a value of 6. We have to find 3 times the value of one bar. Bar models help us to understand what operations, whether addition, subtraction, multiplication or/and division should be used to solve a word problem.

# Read PDF Bar Model Multiplication Problems

## **What is Bar Model? - Definition, Facts & Example**

Bar modelling and the CPA approach. The bar model method draws on the the Concrete, Pictorial, Abstract (CPA) approach – an essential maths mastery concept. The process begins with pupils exploring problems via concrete objects. Pupils then progress to drawing pictorial diagrams, and then to abstract algorithms and notations (such as the +, -, x and / symbols).

## **Model Method ...**

Students can use a model to help them decipher the information and begin to understand how to solve the problem. A model that is great for problem solving with either adding, subtracting, multiplying, or dividing is a bar model. Bar models can be used starting as young as first grade but are also used well into algebra.
