Beyond 2020 -- a vision for the future is a non-partisan, non-political platform where average Americans can express their vision for a post-2020 America. Think of this page as a digital soap box that gives people a voice in the public square. It is operated by volunteers as a public sociology project and is not affiliated or aligned with any other organization, political party, or movement.

In 1998, Dr Kalam and Y.S. Rajan published the now iconic India 2020, a vision document for the new millennium that charted how India could become one of the top five economic powers in the world by 2020. Sixteen years later, as the year 2020 approaches, the authors came out with Beyond 2020 , another book to take stock of how much India has achieved by now and what lies ahead.

Beyond 2020 A Vision For Tomorrows India

India 2020 is about to become a reality. Are we ready? As Dr Kalam and Y.S. Rajan had contended in their landmark vision document, India 2020, India has steadily moved towards becoming one of the top five economic powers in the twenty-first century. India's growth story has seen new opportunities and emerging technologies that make faster and more inclusive growth viable. In Beyond 2020, Kalam and Rajan argue that a renewed policy focus is now needed for agriculture, manufacturing, mining, the chemicals industry, healthcare and infrastructure to invigorate these sectors and boost economic growth. India can still make it to the list of developed nations in a decade. This timely book provides an action plan for that transformation.

Beyond 2020 A Vision For Tomorrows India

In this ground-breaking vision document, first published in 1998, Dr A.P.J. Abdul Kalam and Y.S. Rajan offer a blueprint for India to be counted among the world's top five economic powers by the year 2020. They cite growth rates and development trends to show that the goal is not unrealistic. Past successes:the green revolution and satellite-based communication linking remote regions of the country, for instance;bear them out. The same sense of purpose can make us a prosperous, strong nation in a matter of years, assert Kalam and Rajan. This is a book that every citizen who hopes for a better India must read.

What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of Ignited Minds is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam's vision document of aspiration and hope motivates us to unleash the dormant energy within India and guide the country to greatness.

International speaker and optometrist extraordinaire, Dr. Susan Truong, will tell you that 20/20 defines perfect vision. However, in her book, Beyond 20/20 Vision, she walks you through seven life lessons that will help you to achieve clarity so that you can live your best life! These life lessons will reveal to you that perfect does not stop at 20/20, that there is something much better. way beyond 20/20! Lessons such as living with intention, finding a purpose greater than yourself, facing your fears, embracing change, thriving with a positive mindset, discovering your why, and recognizing your blindspots. These lessons will force you to reach deep into the depth of your heart and soul, which is a necessity if you want to achieve and define the sharpest vision of your best life, your dream life in order to live to your fullest potential. Sight is a function of your eyes. Vision is a function of your heart! Close your eyes and open your heart and mind. Do this as you go through these seven lessons and the exercises within them and you will SEE the path to truly living your best life, the one that you so deserve.

The National Academies of Sciences, Engineering, and Medicine was asked to articulate a 5-year strategic vision for international health security programs and provide findings and recommendations on how to optimize the impact of the Department of Defense (DOD) Biological Threat Reduction Program (BTRP) in fulfilling its biosafety and biosecurity mission. Because BTRP is just one of several U.S. government programs conducting international health security engagement, both the strategic vision and the success of the program rely on coordinating actions with the U.S. government as a whole and with its international partners. This report provides several recommendations for optimizing BTRP success in its current mission and the wider-looking strategic vision it proposes.

In this unique and exhilarating autobiography, Allan Jones | Canada's first blind diplomat | vividly describes how an untreatable eye disease slowly decimated his visual world, most challengingly during his postings in Tokyo and New Delhi, and how he discovered and took to heart the revelatory Indian philosophy that changed his life. Advaita Vedanta, the most iconoclastic and liberating of the classical Indian philosophies, profoundly altered the author's experience of self and world. He found that the true self, as distinct from the individual ego, far exceeds the boundaries of individuality. It lies beneath sightedness or blindness and is absolutely unaffected by the latter. This welcome shift of perspective was reinforced by startling discoveries in contemporary physics, evolutionary biology, and developmental psychology that are fully consistent with Advaitic metaphysics. As for the practical applications of metaphysics, this book demonstrates step by step how Advaitic insight and practice significantly reduce physical and psychological tension. The most telling examples have to do with adjustments compelled by extreme circumstances. Thus Jones describes how he drew upon Advaitic mindfulness techniques to maintain his white cane mobility skills in the teeth of permanent spinal, nerve, and muscle pain. The arc of Beyond Vision moves from the claustrophobically personal to the openness of the transpersonal. It begins in a dysfunctional family background, breaking out into a full life encompassing an adventurous foreign service career, spiritual exploration, and an unconventional kind of marital love.

This book addresses the five traditional social institutions (marriage and family, religion, education, politics, and economics) as well as other important social institutions (health care, race, ethnicity, and technology), projecting into the year 2020 to provide social insight.

A powerful reminder to anyone who thinks design is primarily a visual pursuit. The Senses accompanies a major exhibition at the Cooper-Hewitt Smithsonian Design Museum that explores how space, materials, sound, and light affect the mind and body. Learn how contemporary designers, including Petra Blaisse, Bruce Mau, Malin+Goetz and many others, engage sensory experience. Multisensory design can solve problems and enhance life for everyone, including those with sensory disabilities. Featuring thematic essays on topics ranging from design for the table to tactile graphics, tactile sound, and visualizing the senses, this book is a call to action for multisensory design practice. The Senses: Design Beyond Vision is mandatory reading for students and professionals working in diverse fields, including products, interiors, graphics, interaction, sound, animation, and data visualization, or anyone seeking the widest possible understanding of design. The book, designed by David Genco with Ellen Lupton, is edited by Lupton and curator Andrea Lipps. Includes essays by Lupton, Lipps, Christopher Brosius, Hansel Bauman, Karen Kraskow, Binglei Yan, and Simon Kinnear.

This first volume of the ISATT Conference Series looks for a common path to a better vision on the future of education. It focuses on themes of educational policies, curriculum reforms, and teaching in a multicultural world.
