; The syntax of COBOL is very similar to the English language, that was designed to be self-documenting and very readable.

~~COBOL Tutorial: What is, History, Install, Program Example~~

The definition of this PRIMARY KEY is not complete until you define the UNIQUE INDEX on it. So you must create unique index on this PRIMARY KEY which is the only way DB2 ensures that your PRIMARY KEY will not contain any duplicate values. Creating Unique index is very simple just add the word UNIQUE to normal CREATE INDEX definition.
