[Book] Divisibility Rules Lesson Plan Education
This lesson will be taught in 4th grade for the purpose of learning how to use the rules of divisibility. For Example: using the number "48,888", we will see if this number can be divided by 2,3,4,5,6,7,9,10. 48,888 is divisible by 2, because the last digit is 8, and the divisibility rule says that if the last digit is even, then the number is divisible by 2.

Lesson Plan On Divisibility Rules by Patty Munozcano
The best way to organize a lesson plan on the divisibility rule is to let students figure out the rules themselves. This is especially helpful for students who have math-related learning disabilities. Begin by making a two-column chart on the board, in which the first column has a list of the numbers 2 through 10.
