The project allows you to demonstrate your global understanding of pharmacoepidemiology and pharmacovigilance by analysing a current drug safety issue. You'll be given a number of study reports. You then evaluate the evidence, make decisions based on your assessment, and offer suggestions for future regulatory action and research.

The course will cover key issues
in pharmacoepidemiologic and
drug safety research. Students
will learn about the typical
problems (e.g. confounding by
indication, rare side effects) and
approaches to deal with these
problems in the practice of
pharmacoepidemiology.
