"Throughout history up until present, many cultures have traditionally experienced the effects of verifiable healings, along with hexes, curses, witchcraft, voodoo, and other mysterious phenomena. These effects-many of which were elicited by unscientific means-were brought about by the beliefs and lore of the society. Even today, pharmaceutical companies use double- and triple-blind randomized studies in an attempt to exclude of the power of the mind over the body. In *You Are the Placebo*, Dr. Joe Dispenza explores the history, the science, and the practical applications of the so-called placebo effect. You can see with and without your eyes! Our brain is a wonderful organ - sensitive, creative and flexible. There is still much to discover in it and with it. Most people take seeing with their eyes for granted. Imagine you could see without your eyes. This becomes possible when you learn to perceive your inner ray of vision again. In this process, the information is received directly in the brain without the eye sensory organ, and then processed further. With this knowledge and these abilities, you can navigate your everyday life with ease and joy, guided by your inner compass - your intuition. You enrich and focus your perception at the same time. In this book, author and researcher Dr. oec. Katharina Friedrich describes her training experiences and the background to the 'Seeing Without Eyes' method. You can read reports of experiences with blind people and children, as well as share in the experiences of course participants. The author broadens the horizon of science. You can picture it.

Why do we keep getting the same jobs, taking on the same relationships, and finding ourselves in the same emotional traps? Dr. Joe Dispenza not only teaches why people tend to repeat the same negative behaviors, he shows how readers can release themselves from these patterns of disappointment. With the dynamic combination of science and accessible how-to, Dispenza teaches how to use the most important tool in one's body and life-the brain. Featured in the underground smash hit of 2004, "What the Bleep Do We Know!?", Dispenza touched upon the brain's ability to become addicted to negative emotions. Now, in his empowering book *Evolve Your Brain* he explains how new thinking and new beliefs can literally rewire one's brain to change behavior, emotional reactions, and habit forming patterns. Most people are unaware of how addicted they are to their emotions, and how the brain perpetuates those addictions automatically. In short, we become slaves to our emotional addictions without even realizing it. By observing our patterns of thought, and learning how to 're-wire the brain' with new thought patterns, we can break the cycles that keep us trapped and open ourselves to new possibilities for growth, happiness and emotional satisfaction. Key Features A radical approach to changing addictive patterns and bad habits. Based on more than twenty years of research. Bridges the gap between science, spirituality and self-help-a formula that has proven success. Easy to understand and written for the average reader.
