BMW E46 M3 are known to wear issues with their rear differential and currently the only official solution is to replace the whole assembly at significant cost (£3,000+). If the issues are left unattended it can cause serious damage to the rear diff assembly so we would recommend overhauling the diff when it develops signs of a problem.

BMW Tech Corner - E46 M3 Rear Subframe Reinforcement. After years of aggressive driving, hard launches and hard 1-2 shifts, the under supported rear subframe mounting points in the E46 M3 can fail. Thin sheet metal and a lack of reinforcement leads to small hairline cracks, torn welds and in the worst case scenario, the entire trunk floor can separate, ultimately leading to an extremely costly repair and a very dangerous car to drive.
