polynomials. Discussions focus on the greatest common factor and factoring by grouping, factoring trinomials, special factoring, equations with absolute value, inequalities involving absolute value, formulas, first-degree equations, graphing simple and compound inequalities, and properties of real numbers. The text then takes a look at rational expressions, rational exponents and roots, and quadratic equations. Topics include solving quadratic equations by factoring, discriminant and the sum and product of solutions, multiplication and division of complex numbers, combinations of radical expressions, rational exponents, complex fractions, and multiplication and division of rational expressions. The manuscript elaborates on sequence and series, logarithms, relations and functions, and conic

sections, including ellipses and hyperbolas, nonlinear systems, function and notation, algebra with functions, common logarithms and computations, and word problems. The publication is a dependable reference for students and researchers interested in intermediate algebra.

Kaufmann and Schwitters have built this text's reputation on clear and concise exposition, numerous examples, and plentiful problem sets. This traditional text consistently reinforces the following common thread: learn a skill; practice the skill to help solve equations; and then apply what you have learned to solve application problems. This simple, straightforward approach has helped many students grasp and apply fundamental problem solving skills

necessary for future mathematics courses. Algebraic ideas are developed in a logical sequence, and in an easy-to-read manner, without excessive vocabulary and formalism. The open and uncluttered design helps keep students focused on the concepts while minimizing distractions. Problems and examples reference a broad range of topics, as well as career areas such as electronics, mechanics, and health, showing students that mathematics is part of everyday life. The text's resource package anchored by Enhanced WebAssign, an online homework management tool saves instructors time while also providing additional help and skill-building practice for students outside of class. "The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

Laurie Kirszner and Stephen Mandell believe that students learn to write best when they use their own writing as a starting point. In *Writing First with Readings: Practice in Context*, designed for the paragraph to essay course, Kirszner and Mandell take seriously the ideas and expressive abilities of developmental students, as well as their need to learn the rules of writing and grammar. Visual writing prompts that open every chapter get students writing immediately. By moving frequently between their own writing, writing models and instruction, and workbook-style mastery exercises, students get constant reinforcement of the skills they are learning. Thoughtful chapters on college success, research, and critical reading, along with high-interest essays, round out the text, making it the perfect
