Naturally occurring RNA always contains numerous biochemically altered nucleotides. They are formed by enzymatic modification of the primary transcripts during the complex RNA maturation process designated RNA modification. A large number of enzymes catalyzing the formation of these modified nucleosides or converting one canonical base into another at the posttranscriptional level have been studied for many years, but only recently have systematic and comparative studies begun. The functions of individual enzymes and/or the modified/edited nucleosides in RNA, however, have remained largely ignored. This book provides advance information on RNA modification, including the associated editing machinery, while offering the reader some perspective on the significance of such modifications in fine-tuning the structure and functions of mature RNA molecules and hence the ability to influence the efficiency and accuracy of genetic expression. Outstanding scientists who are actively working on RNA modification/editing processes have provided up-to-date information on these intriguing cellular processes that have been generated over the course of millions of years in all living organisms. Each review has been written and illustrated for a large audience of readers, not only specialists in the field, but also for advanced students or researchers who want to learn more about recent progress in RNA modification and editing.

These poems come from my deepest and darkest feelings during a difficult time in my life. I was inspired to publish them after receiving support from all those who read them. Outcast's Lament And Other Poems reflect the trials and experiences I faced while growing up. I hope they capture the deepest and the darkest. These are the thoughts most of us feel, but may not vocalize. My poems mostly come as stream of thought, and in truth, they are never finished. First-time author Ahmed Abdel-Rahim of Alexandria, Egypt, is a dentist. He writes music lyrics and is fascinated with history, romantic poetry and fantasy. His next project is writing a fantasy novel. Publisher's Website: <http://sbpra.com/AhmedAbdelRahi>

New Punk Cinema is the first book to examine a new breed of film that is indebted to the punk spirit of experimentation, do-it-yourself ethos, and an uneasy, often defiant relationship with the mainstream. An array of established and emerging scholars trace and map the contours of new punk cinema, from its roots in neorealism and the French New Wave, to its flowering in the work of Lars von Trier and the Dogma 95 movement. Subsequent chapters explore the potentially democratic and even anarchic forces of digital filmmaking, the influences of hypertext and other new media, the increased role of the viewer in arranging and manipulating the chronology of a film, and the role of new punk cinema in plotting a course beyond the postmodern. The book examines a range of films, including The Blair Witch Project, Time Code, Run Lola Run, Memento, The Celebration, Gummo, and Requiem for a Dream.New Punk Cinema is ideal for classroom use at the undergraduate and graduate levels, as well as for film scholars interested in fresh approaches to the emergence of this vital new turn in cinema.Features* Offers a comprehensive examination of the term 'new punk' cinema.* Provides several new approaches for the study of digital cinema.* Includes close analysis of several key new punk films and directors.
