Traditional diplomacy is based on the notion

of competing nation-states, each attempting to maximize its autonomy and independence. This notion is at odds with today's world in which even mighty states are enmeshed in a web of interdependence. Much of the world's economy, information, industry, and culture have become global. Given these massive changes, argues Thomas Nowotny, much of traditional diplomacy has become redundant and sometimes counterproductive. Notwithstanding worldwide interdependence, states still anchor this complex global system. In a timelier version of their craft, diplomats retain an important function in

safeguarding and shaping that worldwide interdependence. They are trained to transform differences into consensus and to navigate zones of conflict. But to do so effectively, and to meet today's challenges, they will have to adjust their ways and institutions. Nowotny bases his arguments on his unique experiences in internal organizational politics and in bilateral and multilateral international diplomacy, as well as on his theoretical reflections as an academic. His work aims to merge lessons from these distinct spheres into one comprehensive whole, intertwining practice and theory. To

affect outcomes one, thus, has to deal with practice and theory at the same time. This is what Novotny aims to achieve, and he succeeds admirably.

In the 21st century, the world is faced with threats of global scale that cannot be confronted without collective action. Although global government as such does not exist, formal and informal institutions, practices, and initiatives—together forming "global governance"—bring a greater measure of predictability, stability, and order to trans-border issues than might be expected.

Yet, there are significant gaps between many current global problems and available solutions. Thomas G. Weiss and Ramesh Thakur analyze the UN's role in addressing such knowledge, normative, policy, institutional, and compliance lapses. The UN's relationship to these five global governance gaps is explored through case studies of some of the most burning problems of our age, including terrorism, nuclear proliferation, humanitarian crises, development aid, climate change, human rights, and HIV/AIDS.

extends the G8 and Global Governance series into the domain of international security in both its classic and newer forms. Going beyond the conventional focus on globalization, it takes up the central question of shaping international order, looking at the emergence of several important phenomena including: - The advent of human security - The global importance of once deeply domestic security issues - Enhanced demands for civil society participation

Sections on Japan's perspective on the G8 and international order, critical issues in global security governance and the role of

In this important and path-breaking book, esteemed scholar and public intellectual Richard Falk explores how we can re-imagine the system of global governance to make it more ethical and humane. Divided into three parts, this book firstly scrutinizes the main aspects of Global Governance including, Geopolitics, The Future of International law, Climate Change and Nuclear weapons, 9/11,

Global Democracy and the UN. In the last part, Falk moves the discussion on to the search for Progressive Politics, the Israel/Palestinian conflict and the World Order Models Project. Drawing on, but also rethinking the normative tradition in international relations, he examines the urgent challenges that we must face to counter imperialism, injustice, global poverty, militarism and environmental disaster. In so doing, he outlines the radical reforms that are needed on an institutional level and within global civil society if we are to realize the dream of a

world that is more just, equitable and peaceful. This important work will be of interest to all students and scholars of global politics and international relations.

This interdisciplinary volume explores core emerging themes in the study of early modern literary-diplomatic relations, developing essential methods of analysis and theoretical approaches that will shape future research in the field. Contributions focus on three intimately related areas: the impact of diplomatic protocol on literary production; the role of texts in diplomatic practice,

particularly those that operated as 'textual ambassadors'; and the impact of changes in the literary sphere on diplomatic culture. The literary sphere held such a central place because it gave diplomats the tools to negotiate the pervasive ambiguities of diplomacy; simultaneously literary depictions of diplomacy and international law provided genre-shaped places for cultural reflection on the rapidly changing and expanding diplomatic sphere. Translations exemplify the potential of literary texts both to provoke competition and to promote cultural convergence between political communities,

revealing the existence of diplomatic third spaces in which ritual, symbolic, or written conventions and semantics converged despite particular oppositions and differences. The increasing public consumption of diplomatic material in Europe illuminates diplomatic and literary communities, and exposes the translocal, as well as the transnational, geographies of literary-diplomatic exchanges. Diplomatic texts possessed symbolic capital. They were produced, archived, and even redeployed in creative tension with the social and ceremonial worlds that produced them. Appreciating the generic conventions of

specific types of diplomatic texts can radically reshape our interpretation of diplomatic encounters, just as exploring the afterlives of diplomatic records can transform our appreciation of the histories and literatures they inspired.

This book of essays, written in honour of Professor David Trubek, explores many of the themes which he has himself written about, most notably the emergence of a global critical discourse on law and its application to global governance. As law becomes ever more implicated in global governance and as

processes related to and driven by globalisation transform legal systems at all levels, it is important that critical traditions in law adapt to the changing legal order and problématique. The book brings together critical scholars from the EU, and North and South America to explore the forms of law that are emerging in the global governance context, the processes and legal roles that have developed, and the critical discourses that have been formed. By looking at critical appraisals of law at the global, regional and national level, the links among them, and the normative implications of

critical discourses, the book aims to show the complexity of law in today's world and demonstrate the value of critical legal thought for our understanding of issues of contemporary governance and regulation. Scholars from many countries contribute critical studies of global and regional institutions, explore the governance of labour and development policy in depth, and discuss the changing role of lawyers in global regulatory space.

in European Studies in order to provide lessons for the development, design and normative evaluation of global governance. It brings together scholars of European studies and international relations, where much of the literature on regional and global governance is located, thereby providing interdisciplinary lessons from the study of European Union and its governance that can be used to re-evaluate processes of global governance. Each chapter examines methodological, theoretical or empirical discussions within European studies in order to draw insights for current developments in

global governance.

Recent studies on migration have been given a new focus and theoretical framework. The so-called “political dimension” of Diasporas, and their action at the international level as agents of para-diplomacy, as well as the introduction of analysis of the trans-national character of the migratory phenomenon, allow us to dig deeply into the field of our investigations, taking us out of the narrow frame of the Nation State.

This book is a comprehensive overview of the

theory, history, law, institutional framework and culture of global diplomacy. It reflects on the key existential challenges to the institution and addresses aspects that are often overlooked in diplomatic studies: inter alia diplomatic law, development-driven diplomacy and the bureaucracy of diplomatic practice. All chapters are extensively illustrated with recent case examples from across the world. Special emphasis is placed on incorporating perspectives from Africa and other developing regions in the Global South, so as to balance the Eurocentrism of traditional diplomatic literature.
