Description: With the Half-Life Laboratory, students
gain a better understanding of radioactive dating and
half-lives. Students are able to visualize and model
what is meant by the half-life of a reaction. By
extension, this experiment is a useful analogy to
radioactive decay and carbon dating. Students use
M&M's (or pennies and puzzle pieces) to demonstrate
the idea of radioactive decay.

Chemistry is the study of the structure, behavior, properties and changes undergone by chemical compounds during a reaction with other compounds. It is focused on the creation of such compounds by understanding the interactions between atoms and molecules through chemical bonds. Chemistry is subdivided into various branches such as materials chemistry, inorganic chemistry, nuclear chemistry, analytical chemistry, organic chemistry, theoretical chemistry, etc. The study of phases, energy, bonding, chemical reactions, equilibrium, ions and salts, and acidity and basicity are fundamental to the study of chemistry. This field facilitates the understanding of other basic and applied sciences such as botany, geology, astrophysics, forensics and pharmacology, besides many others. There has been rapid progress in this field and its applications are finding their way across multiple industries. This book attempts to understand the multiple branches that fall under the discipline of chemistry and how such concepts have practical applications. Scientists and students actively engaged in this field will find this book full of crucial and unexplored concepts.

An all-new Star Trek technical manual of the legendary Klingon Bird of Prey, presented in the world-renowned Haynes Manual format! The Bird-of-Prey is the classic Klingon starship—a tough raiding and scouting vessel that has served at the heart of the Klingon Defense Force for more than a hundred years. Life on board is harsh and brutal, with any sign of weakness leading to a challenge to the death. The

ship itself is stripped back and lean, with everything designed for a single purpose—war. This Haynes Manual traces the origins of a Bird-of-Prey from the moment it is commissioned by one of the Great Houses and constructed at the shipyards of the Klingon Naval Academy. It then proceeds to examine General Martok's famous ship the I.K.S. Rotarran in unprecedented detail. Featuring a stunning cutaway drawing and, for the first time ever, detailed deck plans and incredible new computer-generated artwork, the Haynes Bird-of-Prey Manual is a technical tour of the ship's systems, from the bridge and engineering rooms to the disruptors, torpedo launcher, and the all-important cloaking device. In addition, the Manual provides a unique insight into life on board a Klingon ship and the Rotarran's glorious history in the Dominion War. This Haynes Manual is fully authorized by CBS. All the new artwork has been designed by STAR TREK: THE NEXT GENERATION and STAR TREK: VOYAGER's senior illustrator Rick Sternbach, who is the world's leading expert on STAR TREK technology, with CG renders produced by STAR TREK VFX artist Adam 'Mojo' Lebowitz.

Why is the word madre, "mother," so complicated in Spanish—especially in Mexico? Leaping off the page with energy, insight, and attitude, Liza Bakewell's exploration of language is anything but "just semantics." Why does me vale madre mean worthless, while !qué padre! means fabulous, she asks? And why do one hundred madres disappear when one padre enters the room, converting the group from madres to padres? Thus begins a journey through Mexican culture in all its color: weddings, dinner parties, an artist's studio, heart-stopping taxi rides, angry journalists, corrupt politicians, Blessed Virgins, and mothers both sacred and profane. Along the way, a reader discovers not only an invaluable lexicon of Mexican slang (to be used with caution or not at all) but also thought-provoking reflections on the evolution of language; its winding path through culture, religion, and politics; and, not least, what it means—and what it threatens—to be a creative female, a madre.

failings, Paula Huston examines the intellectual, psychological, social, and spiritual meanings of forgiveness. She asks tough questions and then offers possible solutions, drawing a portrait of a truly forgiving person. "One of Jesus' most mind-boggling declarations is that we who hope to follow him must first be willing to forgive the people who have hurt us. Not only does this injunction show up at the heart of the prayer he offers to his disciples ("Give us this day our daily bread...") but he restates it as a requirement for salvation: "If you forgive others their transgressions, your heavenly Father will forgive you. But if you do not forgive others, neither will your Father forgive your transgressions." (Mt. 6:11-15) "He also tells us that if we wish to live in relationship with God, we must first seek forgiveness from those we've hurt: "Therefore, if you bring your gift to the altar, and there recall that your brother has anything against you, leave your gift there at the altar, go first and be reconciled with your brother, and then come and offer your gift." (Mt. 5:23-24). Our damaged relationships with other people, especially when we are responsible for that damage, have a direct effect on our friendship with God."

Rhetorical analyses of the Pauline letters concentrate on the way in which Paul went about persuading his readers by means of his letters. Normally scholars employ ancient rhetorical models to explain this. D. Francois Tolmie's study represents the first attempt to reconstruct Paul's rhetorical strategy in the Letter to the Galatians in a different way, namely by concentrating on the letter itself in order to develop the best categories for describing the way in which
