Hilbert 's interests had moved away from mathematical physics by this time and he did not take any more than a passing interest that Courant was writing the text. In 1925, with Friedrichs as his assistant, Courant began work on a second volume of Courant-Hilbert. By 1928 the new Mathematics Institute, begun the previous year, neared completion.

I have always felt that they belonged together, Courant being, as I have written, the natural and necessary sequel to Hilbert—the rest of the story. To make the two volumes more compatible when publish I am very pleased that my books about David Hilbert, published in 1970, and Richard Courant, published in 1976, are now being issued by Springer-Verlag in a single volume.
