A good way of attacking a stone castle was through mining. Attackers would dig a tunnel underground up to the castle walls, under the gatehouse if possible. They would then set a charge and make an explosion which would make the walls crumble and collapse. The advantage of mining was that the attack could not be seen by those living in the castle.

How to attack a castle? - Fact File: Castles

How to defend a castle. Building up high. Building a castle up high made it difficult for enemies to get to the castle. Some castles were built on natural rocks and cliffs ... Tall towers.
