the ink into the skin, handpoking is done by attaching a needle (professionals use tattoo-grade needles) to a rod-shaped element, like a pencil, to create an analog tattoo machine.

A Comprehensive Guide to All Types of Tattoos

The most common method of tattooing in modern times is the electric tattoo machine, which inserts ink into the skin via a single needle or a group of needles that are soldered onto a bar, which is attached to an oscillating unit. The unit rapidly and repeatedly drives the needles in and out of the skin, usually 80 to 150 times a second.
