From the author of the landmark Shop Class as Soulcraft, a brilliant, first-of-its-kind celebration of driving as a unique pathway of human freedom, one now critically threatened by automation. "A thoughtful, entertaining, and substantive work about the joys of driving." —Wall Street Journal Once we were drivers, the open road alive with autonomy, adventure, danger, trust, and speed. Today we are as likely to be in the back seat of an Uber as behind the wheel ourselves. Tech giants are hurling us toward a shiny, happy " self-driving " future, selling utopia but equally keen to advertise to a captive audience strapped into another expensive device. Are we destined, then, to become passengers, not drivers? Why We Drive reveals that much more may be at stake than we might think. Ten years ago, in the New York Times-bestselling Shop Class as Soulcraft, philosopher-mechanic Matthew B. Crawford—a University of Chicago PhD who owned his own motorcycle shop—made a revolutionary case for manual labor, one that ran headlong against the pretensions of white-collar office work. Now, using driving as a window through which to view the broader changes wrought by technology on all aspects of contemporary life, Crawford investigates the driver ' s seat as one of the few remaining domains of skill, exploration, play—and freedom. Blending philosophy and hands-on storytelling, Crawford grounds the narrative in his own experience in the garage and behind the wheel, recounting his decade-long restoration of a vintage Volkswagen as well as his journeys to thriving automotive subcultures across the country. Crawford leads us on an irreverent but deeply considered inquiry into the power of faceless bureaucracies, the importance of questioning mindless rules, and the battle for democratic self-determination against the surveillance capitalists. A meditation on the competence of ordinary people, Why We Drive explores the genius of our everyday practices on the road, the rewards of " folk engineering, " and the existential value of occasionally being scared shitless. Witty and ingenious throughout, Why We Drive is a rebellious and daring celebration of the irrepressible human spirit.

A philosopher/mechanic's wise (and sometimes funny) look at the challenges and pleasures of working with one's hands "This is a deep exploration of craftsmanship by someone with real, hands-on knowledge. The book is also quirky, surprising, and sometimes quite moving." —Richard Sennett, author of The Craftsman Called "the sleeper hit of the publishing season" by The Boston Globe, Shop Class as Soulcraft became an instant bestseller, attracting readers with its radical (and timely) reappraisal of the merits of skilled manual labor. On both economic and psychological grounds, author Matthew B. Crawford questions the educational imperative of turning everyone into a "knowledge worker," based on a misguided separation of thinking from doing. Using his own experience as an electrician and mechanic, Crawford presents a wonderfully articulated call for self-reliance and a moving reflection on how we can live concretely in an ever more abstract world.

This has been the indispensable companion of chicken breeders since its introduction in 1949. Chapters include the genetics of plumage, egg production, body size, disease resistance, and much more. (Animals/Pets)
