Washback is a phenomenon found internationally in high stakes examinations. This study set in Indonesia sought to explore the washback influence of the national examination system on the attitudes, behaviours and motivations of teachers, learners and parents (Pearson, 1998). Previous studies on national examination in Indonesia had explored the concept without paying sufficient attention to the context and culture within which washback takes place; a culture where examination corruption ...

Existing literature has acknowledged the complexity and multi-directionality of the phenomenon. This study seeks to explore the washback effect of the Malaysian University English Test (MUET), a high-stakes compulsory university entry test. Focusing on students as the main participants in this research, the issue of how Malaysian university students perceive the MUET and their own self-efficacy in relation to the test is examined.

The impact of a test on teaching and learning is commonly referred to as the washback effect. This study investigated the nature and scope of the washback effect from the Intermediate English examination on teachers and students of a public sector college in Pakistan. The research relied on qualitative approach utilizing interviews to collect data from six teachers and six students. The data was analysed using open-coding. The results revealed that there seems to be a strong negative ...

Washback effect in testing is typically seen as either negative, or positive (sometimes referred to as washforward). Washback may be considered harmful to more fluid approaches in language education where definitions of language ability may be limited; however, it may be considered beneficial when good teaching practices result. Washback can also be positive or negative in that it either maintains or hinders the accomplishment of educational goals.

2. ABSTRACT. The influence a test has on teaching and learning is commonly referred to as the 'washback effect'. It is often argued that English examinations in Japan, which tend to be heavily grammar-orientated, have a negative washback effect on teaching and learning. The areas of writing and speaking are of particular concern as both tend to be assessed via indirect testing methods.
