largest Economy China analysts have assured us that great leadership demands great character. Time and again, we've seen that truth play out, as once-thriving organizations falter and fail under the guidance of leaders behaving badly. Why, then, do so many executives remain skeptical about the true value of leadership character? A winning strategy and a sound business model are what really matter, they argue; character is just the icing on the cake. What's been missing from this debate is hard evidence: data that shows not only that leadership character matters for organizational success, but how it matters; and concrete evidence that it leads to better business results. Now, in this groundbreaking book, respected leadership researcher, adviser, and author Fred Kiel offers that evidence—solid data that demonstrates the connection between character, leadership excellence, and organizational results. After seven years of rigorous research based

largest Economy China on a landmark study of more than 100 CEOs and over 8,000 of their employees— observations, Kiel's findings show that leaders of strong character achieved up to five times the ROA for their organizations as did leaders of weak character. Return on Character goes on to reveal: — How leadership character is formed, how it creates value, and how that value spreads throughout the organization — How low-character leaders undermine the success of even the best business plans — How leaders at any level can develop the habits of strong character and —unlearn— the habits of poor character The book also provides a character-building methodology—step-by-step advice and techniques for assessing your own character habits and improving your performance and that of your organization. Return on Character provides the blueprint for building your own leadership character and creating a character-

Conditions of malnutrition, conflict, or a combination of both characterize many Arab countries, but this was not always so. As in much of the developing world, the immediate post-independence period represented an age of hope and relative prosperity. But imperialism did not sleep while these countries developed, and it soon intervened to destroy these post-independence achievements. The two principal defeats and losses of territory to Israel in 1967

largest economy, China and 1973, as well as the others that followed, left in their wake more than the destruction of assets and the loss of human lives: the Arab World lost its ideology of resistance. The Unmaking of Arab Socialism is an attempt to understand the reasons for Arab world's developmental descent from the pinnacle of Arab socialism to its present desolate conditions through an examination of the post-colonial histories of Egypt, Syria, and Iraq.

Plant diseases play an important role on our daily lives. Most of plant diseases are visible and are caused by biotic and/or abiotic factors. Symptoms are usually the results of a morphological change, alteration or damage to plant tissue and/or cells due to an interference of the plant's metabolism. All basic structures of vascular plants are subject to attack by pathogens. The failure in

accurate disease diagnosis and management may lead to huge losses in plant production and related commodities, which causes nutritional food scarcity. Typically, the appearance of a biotic symptom will indicate the relatively late stage of an infection and/or colonization of a pathogen. Expert detection, accurate diagnosis, and timely management play a significant role in keeping plants free from pathogens. In this book expert scholars share their research knowledge and key literature which are vital toward the diagnosis of plant diseases across the globe, addressing traditional plant pathology techniques, as well as advanced molecular diagnostic approach.

largest Economy China inspirational story behind the man who created it. A bestseller in China and now translated into English and updated with recent events, Alibaba by Liu Shiyong and Martha Avery tells the remarkable story behind the Internet phenomenon Alibaba.com and its founder Jack Ma, a man Barron's named one of the World's Top 30 CEOs in 2008. Ma's rise to prominence presents a riveting story: Despite growing up in China during the Cultural Revolution—in a period of total state control of the economy—he developed the keen entrepreneurial instincts that propelled him to billionaire status and enabled him to build a company outside the usual government channels. These instincts and habits incorporated martial arts training and allowed him to recognize, early on, that the Internet could leverage his company to rapid growth and also transform the way business is done around the world.
