A casual reader enters a bookshop looking for a Bible. However, not all the Bibles on display have the same contents! Some have more books than others, some are study editions, some use gender-free language. How did this come about? This Introduction works back through the processes by which the Bible was written, transmitted, copied and declared to be authoritative by various churches. The following topics are dealt with: What is the Bible?; How Biblical Writers Wrote; The Making of the Old Testament; The Making of the Apocrypha; The Making of the New Testament; The Canon of the Bible; The Study of the Bible; The Use of the Bible in Social, Moral and Political Questions. This updated edition takes account of developments in scholarship since the book was first published in 1999 by Penguin. The original edition has been translated into Spanish and Portuguese.

[V.1] Psalms 1-59 -- [v.2] Psalms 60-150.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. EMPACT (Emergency Medical Patients: Assessment, Care & Transport) offers a practical approach to common medical emergencies. Formerly published as AMLS (Advanced Medical Life Support), EMPACT is updated and revised to conform to the 2010 American Heart Association guidelines. Providing foundational chapters on assessment, critical thinking/decision making, and the difficult airway, the text moves on to cover common medical complaints, such as shock/hypoperfusion, dyspnea, chest discomfort or pain, and more. Presenting a realistic approach to the care of the patient, each chapter moves from assessment- and complaint-based primary assessment (identifying and controlling immediate life threats) to field diagnosis and management of immediately treatable underlying diseases. Intended for students with paramedic or other advanced-level training; a familiarity with anatomy, physiology, and pathophysiology; and an overall understanding of the nature of medical emergencies.

Disability, Human Rights, and Information Technology addresses the global issue of equal access to information and communications technology (ICT) by persons with disabilities. The right to access the same digital content at the same time and at the same cost as people without disabilities is implicit in several human rights instruments and is featured prominently in Articles 9 and 21 of the Convention on the Rights of Persons with Disabilities. The right to access ICT, moreover, invokes complementary civil and human rights issues: freedom of expression; freedom to information; political participation; civic engagement; inclusive education; the right to access the highest level of scientific and technological information; and participation in social and cultural opportunities. Despite the ready availability and minimal cost of technology to enable people with disabilities to access ICT on an equal footing as consumers without disabilities, prevailing practice around the globe continues to result in their exclusion. Questions and complexities may also arise where technologies advance ahead of existing laws and policies, where legal norms are established but not yet implemented, or where legal rights are defined but clear technical implementations are not yet established. At the intersection of human-computer interaction, disability rights, civil rights, human rights, international development, and public policy, the volume's contributors examine crucial yet underexplored areas, including technology access for people with cognitive impairments, public financing of information technology, accessibility and e-learning, and human rights and social inclusion. Contributors: John Bertot, Peter Blanck, Judy Brewer, Joyram Chakraborty, Tim Elder, Jim Fruchterman, G. Anthony Giannouris, Paul Jaeger, Sanjay Jain, Deborah Kaplan, Raja Kushalnagar, Jonathan Lazar, Fredric I. Lederer, Janet E. Lord, Ravi Malhotra, Jorge Manrique, Mirriam Nthenge, Joyojeet Pal, Megan A. Rusciano, David Sloan, Michael Ashley Stein, Brian Wentz, Marco Winckler, Mary J. Ziegler.
