These scenarios all represent LEFT OF BANG, the moments before something bad happens. But how many times have you talked yourself out of leaving the restaurant, getting off the elevator, or getting over your silly " gut " feeling about someone? Legendary Marine General James Mattis asked the same question and issued a directive to operationalize the Marine Corps ' Combat Hunter program. A comprehensive and no-nonsense approach to heightening each and every one of our gifts of fear, LEFT OF BANG is the result.

Describes how to listen to your inner protector and increase your sensitivity to threats before they happen.

Mann is only thirteen, yet he has already had to deal with more than most go through in a lifetime. His family is still reeling from the tragic shooting death of his little brother, Jason, each person coping with grief in his or her own way. Mann's mother has stopped eating and is obsessed with preserving Jason's memory, while his father is certain that presenting a hard edge is the only way to keep his remaining son from becoming a statistic. Mann used to paint and ride horseback, but now he's doing everything he can to escape his emotions: getting involved in fights at school, joyriding at midnight, and much worse. His father, at his wit's end, does the only thing he thinks will teach his son how to be a man he abandons him and his friend Kee Lee in the woods, leaving them to navigate their way home, alone.

Maneuver warfare, often controversial and requiring operational and tactical innovation, poses perhaps the most important doctrinal questions currently facing the conventional military forces of the U.S. Its purpose is to defeat the enemy by disrupting the opponent's ability to react, rather than by physical destruction of forces. This book develops and explains the theory of maneuver warfare and offers specific tactical, operational, and organizational recommendations for improving ground combat forces. The authors translate concepts too often vaguely stated by maneuver warfare advocates into concrete doctrine. Although the book uses the Marine Corps as a model, the concepts, tactics, and doctrine discussed apply to any ground combat force.

In a civilized society, violence is rarely the answer. But when it is-it's the only answer. The sound of breaking glass downstairs in the middle of the night. The words, "Move and you die." The hands on your child, or the knife to your throat. In this essential book, self-protection expert and former military intelligence officer Tim Larkin changes the way we think about violence in order to save our lives. By deconstructing our assumptions about violence-its morality, its function in modern society, how it actually works-Larkin unlocks the shackles of our own taboos and arms us with what we need to know to prevent, prepare for, and survive the unthinkable event of life-or-death violence. Through a series of harrowing true-life stories, Larkin demonstrates that violence is a tool equally effective in the hands of the "bad guy" or the "good guy"; that the person who acts first, fastest and with the full force of their body is the one who survives; and that each and every one of us is capable of being that person when our lives are at stake. An indispensable resource, *When Violence is the Answer* will remain with you long after you've finished reading, as the bedrock of your self-protection skills and knowledge.

Noncommissioned officers stand as the backbone of the United States Marine Corps. The Corps is among the most lasting institutions in America, though few understand what makes it so strong and how that understanding can be applied effectively in today's world. In this insightful and thoroughly researched book, Julia Dye explores the cadre of noncommissioned officers that make up the Marine Corps' system of small-unit leadership. To help us better understand what makes these extraordinary men and women such effective leaders, Dye examines the fourteen leadership traits embraced by every NCO. These qualities— including judgment, enthusiasm, determination, bearing, and unselfishness—are exemplified by men like Terry Anderson, the former Marine sergeant who spent nearly seven years as a hostage in Beirut, John Basilone, the hero of the Pacific, and many others. To assemble this extraordinary chronicle, Julia Dye interviewed Anderson and dozens of other Marines, mining a rich trove of historical and modern NCO heroes that comprise the Marine Corps' astonishing legacy, from its founding in 1775 to the present day.
