Discover the astonishing world of reptiles and amphibians in a new book by photographer Matthijs Kuijpers Award-winning Dutch nature photographer Matthijs Kuijpers (born 1973) specializes in herpetofauna: reptiles and amphibians. From the depths of the world’s jungles to its driest deserts, Kuijpers has spent 27 years pursuing reptiles and amphibians around the globe. He has photographed 1,500 cold-blooded species (and counting), some of which are exceedingly rare. Kuijpers shoots in astonishing close-up detail, seeking to spotlight the essence of each animal--“no distractions, no environment,” as he puts it. Featuring his subjects against a plain black backdrop, Kuijpers brings out their extraordinary colors and textures, even seeming to capture the personality of creatures like the mossy frog, the smooth helmeted iguana and the plumed basilisk. Matthijs Kuijpers: Cold Instinct, the photographer’s first book, is a gorgeously produced collection of some of the most peculiar species that have ever crawled or slithered on the earth.

Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library’s new set of beautifully repackaged hardcover classics by Truman Capote—also available are Breakfast at Tiffany’s and Other Voices, Other Rooms (in one volume), Portraits and Observations, and The Complete Stories Truman Capote’s masterpiece, In Cold Blood, created a sensation when it was first published, serially, in The New Yorker in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the “new journalism.” Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. “I thought he was a very nice gentleman,” he says of Herb Clutter. “Soft-spoken. I thought so right up to the moment I cut his throat.” Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers’ flight, Capote’s account is so detailed that the reader comes to feel almost like a participant in the events.

In 1959, Olathe, Kansas, was made famous by the murder of the Clutter family and Truman Capote’s groundbreaking book on the crime, In Cold Blood. But fewer know that Olathe achieved notoriety again in 1982, when a member of Olathe’s growing Evangelical Christian population, a gentle man named David Harmon, was bludgeoned to death while sleeping—the force of the blows crushing his face beyond recognition. Suspicion quickly fell on David’s wife, Melinda, and his best friend, Mark, student body president of the local Bible college. However, the long arms of the church defended the two, and no charges were pressed. Two decades later, two Olathe policemen revived the cold case making startling revelations that reopened old wounds and chasms within the Olathe community—revelations that rocked not only Olathe, but also the two well-heeled towns in which Melinda and Mark resided. David’s former wife and friend were now living separate, successful, law-abiding lives. Melinda lived in suburban Ohio, a devoted wife and mother of two. Mark had become a Harvard MBA, a high-paid corporate mover, a family man, and a respected community member in a wealthy suburb of New York City. Some twenty years after the brutal murders, each received the dreaded knock of justice on the door. A Cold-Blooded Business provides fascinating character studies of Melinda and Mark, killers who seemingly returned to normalcy after one blood-splattered night of violence. Featuring a new afterword by the author covering the events of the past five years, this fast-moving true crime narrative is a chilling exploration into the darkest depths of the human psyche.
