As expected the apex is another low budget low quality home gym from Marcy. Just like the low quality crap pushed by companies like Weider this home gym really baffles me as to why it's pushed into the market. Yeah it's affordable, but that doesn't mean people have to put up with the poor quality this gym has to offer.

Deep in lost history, did high civilizations and advanced knowledge thrive? The ancient Vedic literatures of India describe a worldwide civilization that flourished at a time when modern historians insist that humans like us existed simply as hunter-gatherers. This Vedic civilization, centered in India, employed technologies based on a scientific understanding of the physical elements and forces we know today, as well as more subtle conscious elements. Devamrita Swami, who has spent a lifetime in his own search for Vedic India, takes us on a journey of intellectual discovery through the history of the remarkable Vedic civilization and its knowledge, locked in the ancient literatures of India. His wit and wisdom combine to make our search for Vedic India not only illuminating but entertaining. He tells us not only the truths of Vedic India, but how they are again coming to be. Searching for Vedic India thus takes us not only into the past, but into the future.

For over 40 years, Warship has been the leading annual resource on the design, development, and deployment of the world's combat ships. Featuring a broad range of articles from a select panel of distinguished international contributors, this latest volume combines original research, new book reviews, warship notes, an image gallery, and much more, maintaining the impressive standards of scholarship and research with which Warship has become synonymous. In the 2019 edition of this celebrated title, articles include Hans Lengerer's exploration of the genesis of the Six-Six Fleet, Michele Cosentino's look at Project 1030, Italy's attempt to create a torpedo-armed attack and ballistic missile submarines, and A D Baker III's drawing feature on the USS Lebanon. Detailed and accurate information is the keynote of all the articles, which are fully supported by plans, data tables and stunning photographs.

While challenging the teacher as hero trope, We Got This shows how authentically listening to kids is the closest thing to a superpower that we have. Cornelius identifies tools, attributes, and strategies that can augment our listening.

Carter Sloan is a trained assassin—the best there is, pulled out of cryogenic sleep whenever an assignment demands his skills. So when he's kept in the deep freeze for 258 years, he's seriously pissed off. Yet his government needs him, to hunt down the enemy known as the Daughter of the Brass Dragon. The future of the galaxy-spanning Reich depends on it, so Sloan is off-screwing, swearing, and shooting his way across interstellar space. It's action, adventure, and disgusting gelatinous aliens as only Victor Gischler can create them.
