---

## xtable.summary function | R Documentation

This function displays or writes to disk the code to produce a table associated with an object `x` of class "xtable". The resulting code is either a LaTeX or HTML table, depending on the value of `type`. The function also (invisibly) returns a character vector of the results (which can be helpful for post-processing).

---

## print.xtable function | R Documentation

Details This function creates a LaTeX representation of an object of class "xtable". This is a method for the generic "toLatex" in the core R package "utils". Author(s) Charles Roosen <roosen@gmail.com> with contributions and suggestions from many others (see source code).

---

## Package 'xtable'

Construct Complex Table with 'kable' and Pipe Syntax. Build complex HTML or 'LaTeX' tables using 'kable ()' from 'knitr' and the piping syntax from 'magrittr'. Function 'kable ()' is a light weight table generator coming from 'knitr'. This package simplifies the way to manipulate the HTML or 'LaTeX' codes generated by 'kable ()' and

# Download File PDF Package Xtable R

allows users to construct complex tables and customize styles using a readable syntax.

CRAN - Package xtable

R Development Page Contributed R Packages . Below is a list of all packages provided by project xtable. Important note for package binaries: R-Forge provides these binaries only for the most recent version of R, but not for older versions. In order to successfully install the packages provided on R-Forge, you have to switch to the most recent version of R or, alternatively, install from the package sources (.tar.gz).
