The Financial Risk Management Exam (FRM Exam) is a test given annually in November to risk professionals who want to earn FRM® certification. The Global Association of Risk Professionals has developed the exam and supports exam instruction by publishing the Financial Risk Manager Handbook, authored by Philippe Jorion. Every year, GARP organizes the exam and the FRM® Certificate Program, whose goal is to establish an industry standard of minimum professional competence in the field. The examination is fast becoming an essential requirement for risk managers all over the world. The goal is to make The FRM Handbook the definitive instructor's guide for the exam and learning guide among in-house training programs and university courses focused on financial risk management.

An essential guide to financial risk management and the only way to get a great overview of the subjects covered in the GARP FRM Exam The Financial Risk Management Exam (FRM Exam) is given by the Global Association of Risk Professionals (GARP) annually in November for risk professionals who want to earn FRM(r) certification. The Financial Risk Manager Handbook, Fourth Edition is the definitive guide for those preparing to take the FRM Exam as well as a valued working reference for risk professionals. Written with the full support of GARP, and containing questions and solutions from previous exams, this book is a valuable resource for professionals responsible for or associated with financial risk management.

While First Amendment doctrine treats religion as a human good, the state must not take sides on theological questions. Koppelman explains the logic of this uniquely American form of neutrality: why it is fair to give religion special treatment, why old (but not new) religious ceremonies are permitted, and why laws must have a secular purpose.

This book is Part II of the fourth edition of Robert Sedgewick and Kevin Wayne 's Algorithms , the leading textbook on algorithms today, widely used in colleges and universities worldwide. Part II contains Chapters 4 through 6 of the book. The fourth edition of Algorithms surveys the most important computer algorithms currently in use and provides a full treatment of data structures and algorithms for sorting, searching, graph processing, and string processing -- including fifty algorithms every programmer should know. In this edition, new Java implementations are written in an accessible modular programming style, where all of the code is exposed to the reader and ready to use. The algorithms in this book represent a body of knowledge developed over the last 50 years that has become indispensable, not just for professional programmers and computer science students but for any student with interests in science, mathematics, and engineering, not to mention students who use computation in the liberal arts. The companion web site, algs4.cs.princeton.edu contains An online synopsis Full Java implementations Test data Exercises and answers Dynamic
