Jenny Holzers Werke erreichen und berühren ein großes Publikum weltweit. In den 1980er Jahren zeigte die Künstlerin ihre aufrüttelnden politischen Texte auf LED-Anzeigentafeln und Laufbändern in Flughäfen oder Sportstadien. Für ihre jüngeren Lichtarbeiten benutzt sie Xenon-Scheinwerfer, mit denen sich Schriftzüge auf jede Gebäudefläche, aber auch auf Plätze oder Flüsse projizieren lassen. Die Publikation dokumentiert einen Querschnitt aus Jenny Holzers Lichtkunst-uvre, für den die Künstlerin im Rahmen der Duisburger Akzente 2004 Textbotschaften aus ihren berühmten Arbeiten Truisms (1977-1979), Inflammatory Essays (1979-1982), Survival (1983-1985) und Mother and Child (1990) auf die monumentalen Stahlskulpturen des Hochofens im ehemaligen Thyssen-Hüttenwerk sowie auf weitere markante Architekturen der Duisburger Innenstadt projizierte. Alle Texte der Xenon-Installationen erstmals in neuer deutscher Übersetzung.

#1 New York Times bestselling author Stephanie Laurens returns with another mysterious tale of the London underworld from the Casebook of Barnaby Adair. Miraculously spared from death, Malcolm Sinclair erases the notorious man he once was. Reinventing himself as thomas Glendower, he strives to make amends for his past, yet he never imagines penance might come via a secretive lady he discovers living in his secluded manor. Rose has a plausible explanation for why she and her children are residing in thomas's house, but she quickly realizes he's far too intelligent to fool. Revealing the truth is impossibly dangerous, yet day by day he wins her trust, and then her heart. But then her enemy closes in, and Rose turns to thomas as the only man who can protect her and the children. And when she asks for his help, thomas finally understands his true purpose, and with unwavering commitment, he seeks his redemption in the only way he can - through living the reality of loving Rose.

Nineteen-year-old Claire MacDougal prides herself on being sexy, independent, and

noncommittal. She shows off what her mother gave her in a scantily clad uniform, getting big tips at the restaurant where she works. Then, she encounters an old classmate with educational ambitions who invites her to his church, and she finds herself falling for him despite the fact that they come from two different worlds. Stuart Jacobs had always had feelings for Claire in high school, but never pursued her because his extracurricular activities would not permit him the time to have a relationship...nor was he her ideal. Now his mother is adamant on him meeting and pursuing a relationship with the daughter of a highly esteemed mayoral candidate, but after running into Claire after graduation, he sees it as fate and will stop at nothing to be with her. However, when he finds himself competing with a friend for her attention, she becomes the talk of every concerned mother at Renewal Baptist Church. Meanwhile, Cecelia Faulks, First Lady of Renewal, is dedicating her summer to instilling faith and wisdom into a group of young adults, all while trying to keep the church and her marriage together with a smile. Cecelia sees the bond forming between Claire and Stuart and tries to talk down the bad rumors swirling about her, but when the rumors are confirmed, will it be too late to change for the girl who was all about her thighs?

More than a decade ago, world-renowned control systems authority Frank L. Lewis introduced what would become a standard textbook on estimation, under the title *Optimal Estimation*, used in top universities throughout the world. The time has come for a new edition of this classic text, and Lewis enlisted the aid of two accomplished experts to bring the book completely up to date with the estimation methods driving today's high-performance systems. *A Classic Revisited Optimal and Robust Estimation: With an Introduction to Stochastic Control Theory, Second Edition* reflects new developments in estimation theory and design techniques. As the title suggests, the major feature of this edition is the inclusion of robust methods. Three new chapters cover the robust Kalman filter, H-infinity filtering, and H-infinity filtering of discrete-time systems. *Modern Tools for Tomorrow's Engineers* This text overflows with examples that highlight practical applications of the theory and concepts. Design algorithms appear conveniently in tables, allowing students quick reference, easy implementation into software, and intuitive comparisons for selecting the best algorithm for a given application. In addition, downloadable MATLAB® code allows students to gain hands-on experience with industry-standard software tools for a wide variety of applications. This cutting-edge and highly interactive text makes teaching, and learning, estimation methods easier and more modern than ever.

The US trade union movement finds itself on a global battlefield filled with landmines and littered with the bodies of various social movements and struggles. Candid, incisive, and accessible, this text is a critical examination of labour's crisis and a plan for a bold way forward into the 21st century.

Why do people commit crimes? How do we control crime? The theories that criminologists use to answer these questions are built on a number of underlying assumptions, including those about the nature of crime, free will, human nature, and society. These assumptions have a fundamental impact on criminology: they largely determine what criminologists study, the causes they examine, the control strategies they recommend, and how they test their theories and evaluate crime-control strategies. In *Toward a Unified Criminology*, noted criminologist Robert Agnew provides a critical examination of these assumptions, drawing on a range of research and perspectives to argue that these assumptions are too restrictive, unduly limiting the types of "crime" that are explored, the causes that are considered, and the methods of data collection and analysis that are employed. As such, they undermine our

ability to explain and control crime. Agnew then proposes an alternative set of assumptions, drawing heavily on both mainstream and critical theories of criminology, with the goal of laying the foundation for a unified criminology that is better able to explain a broader range of crimes.

“ I have dents, bruises, scars, and cracks so deep that it's a wonder I'm not in a million pieces... ” Sometimes things aren't always what they seem. Sometimes pain lies underneath, buried so deep that for a moment you let yourself forget – until you can't. I didn't realize how numb I was until I started feeling again, and he made me feel – everything. Cooper Hudson came into my life when I needed him the most – twice. This is my story. This is the story of us. “ It was funny how you never really realized how lifeless you were until someone came along and gave you that shock to the chest that forced your heart to start beating again. ”

To some Natasha Iyer has it all - Living the life of an affluent NRI, wife of a prominent Psychologist and mother to a cheeky 11 year old. However, behind closed doors, cracks are beginning to appear in her seemingly comfortable relationship with her professionally consumed husband, Rakesh. Although Rakesh seems content with his alpha neatness-fetish-melodramatic wife and bright son; Natasha yearns for romance, passion and excitement. Ironically, the Psychologist husband fails to read between the lines and Natasha is left to her own devices to deal with her unresolved emotions. An unexpected call from India takes her through a journey of self-discovery with her devastatingly handsome work colleague, Steve. She uncovers in some aspects urban India has changed considerably but equally, deep-rooted social issues still prevail in the so called modern, educated, changing society. A chance encounter with her 'blast from the past' - Veer, adds to the emotional rollercoaster ride. Her one-man-woman status of many years has failed to equip her with vital tools to deal with the unanticipated surge of attention from Steve and Veer. As she attempts to master the finer points of courtship, flirtation and seduction; her life spirals out of control. Natasha is compelled to make tough decisions about her love, friendship, marriage and parenthood.

Contrary to the trend to do away with arts education as an unnecessary expense in schools trying to boost student test scores, this book promotes and explains the value of integrated arts instruction in furthering the accomplishment of curricular objectives and fostering student achievement. It discusses how drama, shadow puppetry, and podcasting can be used as tools to meet curriculum objectives in the K-8 media center, as well as the affective and academic benefits of this process-based work. Sample lessons are included.
