A new high-level book for professionals from Atlantis Press providing an overview of nanotechnologies now and their applications in a broad variety of fields, including information and communication technologies, environmental sciences and engineering, societal life, and medicine, with provision of customized treatments. The book shows where nanotechnology is now - a fascinating time when the science is transitioning into complex systems with impact on new products. Present and future developments are addressed, as well as a larger number of new industrial and research opportunities deriving from this domain. An overview for professionals, researchers and policy-makers of this very rapidly expanding field. Brief chapters and colour figures with a contained overall length make the book attractive at an attractive price - a must for every professional ' s shelf. Mihail C. Roco, National Science Foundation and National Nanotechnology Initiative, wrote the preface underlying the importance and weight of the present book to this exciting and epoch-awakening field of research and applications: " Nanotechnology is well recognized as a science and technology megatrend for the beginning of the 21st century. This book aims to show where nanotechnology is now - transitioning to complex systems and fundamentally new products - and communicates the societal promise of nanotechnology to specialists and the public. Most of what has already made it into the marketplace is in the form of " First Generation " products, passive nanostructures with steady behaviour. Many companies have " Second Generation " products, active nanostructures with changing behaviour during use, and embryonic " Third Generation " products, including 3-dimensional nanosystems. Concepts for " Fourth Generation " products, including heterogeneous molecular nanosystems, are only in research. "

German history films that focus on utopianism and political dissent and their effect on German identity since 1989.

Eleven-year-old Max partners with an unusual girl, Rose, who shares his appreciation of the silver owls that the High Echelon wants to destroy, and together they make a perilous journey seeking to fulfill a prophecy.

Farts. The big problem. But, where does the problem start? Is it the word? "Fart." What's in a name, anyway? Could renaming the fart be the answer? Would a new name solve the big problem? So many questions. So few answers. And so many new words for "fart." Most of which you will not find in the dictionary. Most of which will make you laugh. (And there's a useful little lesson at the end.) Brap.

Brimming with charm, sparkling prose and undeniably unique characters, this hilarious novel set in the Tower of London has the transportive qualities and delightful magic of the contemporary classics Chocolat and Amelie. Balthazar Jones has lived in the Tower of London with his loving wife, Hebe, and his pet, the oldest living tortoise, for the past eight years. That's right, he is a Beefeater. It's no easy job navigating the trials and tribulations that come with living and working in the largest tourist attraction in London. The once white-hot flame of Hebe and Balthazar's love has been snuffed in the few years since their son Milo died, a death for which Balthazar blames himself. When Balthazar is tasked with setting up an elaborate menagerie within the Tower walls to house the many exotic animals gifted to the Queen by foreign dignitaries, life at the Tower gets all the more interesting. Penguins escape, a bearded pig goes missing, giraffes are stolen, the komodo dragon sends innocent people running for their lives, and canaries suffer fainting fits. As he attempts to cope with this four-legged invasion and his marriage continues to crumble, Balthazar must confront the secret he has been harbouring about his son's death, if he wants to save his marriage and his sanity. CAST OF CHARACTERS Balthazar Jones: Beefeater, overseer of the Tower's royal menagerie, father to Milo, and collector of rain Hebe Jones: Balthazar's wife who works at London Underground's Lost Property Office Mrs. Cook: Balthazar and Hebe's 180 + year-old tortoise - the oldest tortoise in the world Arthur Catnip: London Underground ticket inspector of limited height Rev. Septimus Drew: Tower chaplain who writes forbidden prose and pines for one of the residents Ruby Dore: Barmaid at the Tower's Rack & Ruin pub who has a secret Valerie Jennings: Hebe's eccentric colleague who falls for someone of limited height The Ravenmaster: Philandering Beefeater who looks after the Tower's ravens Sir Walter Raleigh: Former Tower prisoner and its most troublesome ghost Chief Yeoman Warder: Suspicious head Beefeater Oswin Fielding: Equerry to The Queen Samuel Crapper: Lost Property Office's most frequent customer Yeoman Gaoler: Deputy to the Chief Yeoman Warder who is terrorized by ghostly poetry at night

The complete scripts, with photographs, of the fantastically popular and outrageously funny comedy series called Fawlty Towers, by the founder of "Monty Python's Flying Circus", and the author and star of A Fish Called Wanda.

Adaptive Multimodal Interactive Systems introduces a general framework for adapting multimodal interactive systems and comprises a detailed discussion of each of the steps required for adaptation. This book also investigates how interactive systems may be improved in terms of usability and user friendliness while describing the exhaustive user tests employed to evaluate the presented approaches. After introducing general theory, a generic approach for user modeling in interactive systems is presented, ranging from an observation of basic events to a description of higher-level user behavior. Adaptations are presented as a set of patterns similar to those known from software or usability engineering. These patterns describe recurring problems and present proven solutions. The authors include a discussion on when and how to employ patterns and provide guidance to the system designer who wants to add adaptivity to interactive systems. In addition to these patterns, the book introduces an adaptation framework, which exhibits an abstraction layer using Semantic Web technology. Adaptations are implemented on top of this abstraction layer by creating a semantic representation of the adaptation patterns. The patterns cover both graphical interfaces as well as speech-based and multimodal interactive systems.

The book is an autobiography of my life and covers it all from day one, with my unexpected and untimely arrival, to my finish now and all that went on between in my days before school, my days at school, my time in the British Army and the time in the Kent Fire and Rescue Service and the Hereford and Worcester Fire and Rescue Service. I have put into the book things that I think people will find amusing, and also interesting and informative, and lastly of all the things that I think could make people cry. The book is not entirely about things that happed to me during my time while in the Fire Service. I have also taken part in other events that have gone on outside the working environment and having kept a diary during these events which has enabled me to write an accurate and hopefully amusing account of these times. Obviously I have not tried to be amusing or funny when someone has been injured or killed as I think this would not be right or proper. I hope you enjoy reading my book as much as I did when writing it.

Print version of the book includes free access to the app (web, iOS, and Android), which offers interactive Q&A review plus the entire text of the print book! Please note the app is included with print purchase only. Epilepsy Board Review is designed as a primary study tool to help candidates prepare for the epilepsy board certification exam. Using structured question formats typically encountered on the boards, this book covers the base knowledge tested and allows users to assess their proficiency in a wide range of topics necessary to achieve subspecialty certification in the field of epilepsy. This high-yield review contains over 360 questions with answers, detailed explanations, and references. The book consists of four parts that cover the phenomenology of seizures and epileptic disorders, basic EEG, diagnostic evaluation of seizures and epilepsy, and treatment of epilepsy. Liberal use of images illustrating specific EEG and neuroimaging findings enhances interpretive skills and facilitates translation of visual knowledge into the clinical practice of epilepsy. Questions are randomized and include both case-based and stand-alone items to familiarize candidates with the question types and formats typically encountered on an exam. Key Features: The first dedicated self-assessment and review book for the epilepsy board certification exam Contains over 360 board-type questions with answers, detailed rationales, and references Facilitates recall of must-know information and helps identify knowledge gaps for further study Includes case-based and stand-alone questions, supplemented by 87 state-of-the-art illustrations, to ensure familiarity with the testing environment encountered in a board exam
