Issues for Jan. 1973-May 1977 include section: Industrialized building.

This carefully-researched book covers exciting trends in residential construction, commercial construction, real estate brokerage, property management, investment, finance, hotels, shopping centers, office buildings, mortgages, development, architecture, REITs and more. This reference tool includes thorough market analysis as well as our highly respected trends analysis. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of nearly 400 leading companies in all facets of the real estate, construction, design and mortgages industry. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

This book from an expert on metal building systems--the first an author unaffiliated with an industry trade group--offers important, valuable, and unbiased information that can save you money and time--and that may even save your building! Full of essential features, tips and advice, this guide goes beyond manufacturer-supplied information to warn you of potential design pitfalls and to point out specific recurring problems and failures of MBS drawn from actual experience. It provides specific help--unavailable elsewhere--with specifying and selecting secondary framing, walls, roofs, and much, much more. This is the one book that is a must-have for any professional involved with pre-engineered buildings.
