Tomorrow is Kalamata's first day at a new school, and she's nervous! What if the kids aren't friendly? Or worse, what if they don't like alligators? If only Kalamata and Al Dente could go to back to the Indian spice market they visited this summer, then maybe she'd remember how to feel brave when new experiences seem scary. Luckily for Kalamata, all the magic required for her journey is right in her own kitchen! As Kalamata and her alligator friend, Al Dente, transport themselves to a magical land filled with tasty ingredients, she realizes being brave is exciting! And most importantly, she learns that when we're nervous about trying new things, food can comfort us and remind us to stay curious, courageous, and compassionate.

Attrition in the Engineering disciplines at all Universities is a huge problem. This text, in its first edition, promised to educate all interested in the Engineering area as a whole. Educators and students bought this book because of their great interest in seeing engineers thrive and made it wildly successful. In this edition more information about engineering careers and the discipline generally is to be included. This practical approach is edging out the voluminous, traditional introduction to engineering books. In this second edition of The Engineering Student Survival Guide, Chapter 2 has been heavily revised with a completely new section entitled, "Ten Tricks of the Old-Timers (Upperclassmen)". Much of the information pertaining to the time before a freshman's first class begins has been deleted. This book is part of the B.E.S.T. (Basic Engineering Series and Tools) Series, which consists of modularized textbooks offering virtually every topic and specialty likely to be of interest to engineers. All the texts boast distinguished authors and the most current content. The goal of this series is to provide the educational community with material that is timely, affordable, of high quality, and flexible in how it is used.
