Creating business process models that can be shared effectively across the business - and between business and IT - demands more than a digest of BPMN shapes and symbols. It requires a step-by-step methodology for going from a blank page to a complete process diagram. It also requires consistent application of a modeling style, so that the modeler's meaning is clear from the diagram itself. Author Bruce Silver explains not only the meaning and proper usage of the entire BPMN 2.0 palette, but calls out the working subset that you really need to know. He also reveals the hidden assumptions of core concepts left unexplained in the spec, the key to BPMN's deeper meaning. The book addresses BPMN at three levels, with primary focus on the first two. Level 1, or descriptive BPMN, uses a basic working set of shapes and symbols to meet the needs of business users doing process mapping. Level 2, or analytical BPMN, is aimed at business analysts and architects. It takes advantage of BPMN's expressiveness for detailing event and exception handling, key to analyzing and improving process performance and quality. Level 3, or executable BPMN, is brand new in BPMN 2.0. Here the XML underneath the diagram shapes becomes an executable design can be deployed to a process engine to automate the process. The method and style detailed in the book aligns these three levels, facilitating business-IT collaboration throughout the process lifecycle. Inside the book you'll find discussions, illustrated with over 100 examples, about: The questions BPMN asks, and does not ask The meaning of basic concepts

The current volume contains selected papers submitted after Critical Link 5 (Sydney 2007) and arises from its topic – quality interpreting being a communal responsibility of all the participants. It takes the much discussed theme of professionalisation of community interpreting to a new level by stating that achieving quality depends not only on the technical skills and ethics of interpreters, but equally upon all other parties that serve multilingual populations: speakers, employers and administrators, educational institutions, researchers, and interpreters. Major articles outline both innovative practices in legal and medical settings and prevailing deficiencies in community interpreting in different countries. While Part I, A shared responsibility: The policy dimension, addresses the macro environment of specific social policy contexts with constraints that affect interpreting, Part II, Investigations and innovations in quality interpreting, reveals a number of admirable cases of interpreters working together with their client institutions in a variety of social settings. Part III is dedicated to the questions of Pedagogy, ethics and responsibility in interpreting. The collection is an important reference book catering to the interpreting community: interpreting practitioners and interpreter users, researchers, educators, and students.
