Related to, but distinct from, the hypothesis that specialization promotes speciation is the hypothesis that speciation in itself generates specialization. Futuyma & Moreno (1988) The title of his most famous book notwithstanding, Darwin dealt little with how new species come into being (Mayr, 1942 , p. 147).

Read PDF Specialization Speciation And Radiation The Evolutionary Biology Of

An adaptive radiation is a burst of evolution, creating several new species out of a single parent species. As when we discussed species richness, it is useful here to think of uninhabited "islands" of habitat, though in this case, the islands merely need to be uninhabited by the species in question.
