The Nhs Experience The Snakes And Ladders Guide For ... Snakes are being recruited as animal "therapists" by the NHS to treat depression. A London clinic is the first to use reptiles to help patients overcome low self-worth and "communication issues".

NHS recruits snakes to treat depression | London Evening ... NHS 'experience' opportunities There are several facilities around the country that help give school and college students a taste of what it's like to work for the NHS. Some are facilities for school and college groups to visit and others are mobile units that can take simulation experiences to schools and colleges.

At once a novel and a guide, this book takes the reader on a fictional journey through the life of Daniel, a child with cystic fibrosis.

Final-year nursing students are often nervous about making

the transition to being a registered nurse. This book helps students prepare for their first nursing role and uses 'real life' scenarios to consolidate their skills. It guides students through the final year with its increased demands, and assists them in meeting the NMC requirements for registration. It covers content commonly found on final year transition to practice modules including coping with stress; applying for jobs; what to expect from your first role; dealing with change; delegating and managing junior staff; handling risky situations; managing priorities and developing your career.

Intellectual disability nurses can be found working and supporting people in a variety of different care contexts. These include the healthcare system, social care and education, as well as the private sector (including voluntary and not for profit organizations). There are also many disciplines that support these areas where practitioners also work closely with people who have learning and intellectual disabilities. The Oxford Handbook of Learning and Intellectual Disability Nursing is a practical, easily accessible, informative and up-to-date quick reference guide for students and practitioners of intellectual disability nursing who require guidance on the specific nursing care needs of patients with a learning or intellectual disability.

Veronica Burton's first experience of depression came as a teenager. Following a ten year remission, during which she gained her general nursing qualification and completed her Special and Intensive Nursing of the Newborn course, work-related events precipitated a depressive relapse that has lasted to the present day. Since her retirement on medical grounds, she has campaigned against prejudice by nurses

toward other nurses - including mental health nurses - who need psychological support of any kind. This book recounts the author's experiences of major depression, hospital admissions and treatments including medication, ECT and 'talking treatments'. It discusses the care given by medical and nursing staff and social and medical prejudices against those with psychiatric illnesses from a medical practitioner's perspective. Like stumbling on a secret room in a familiar building. In illuminating these previously inaccessible corners of her illness experience, she forces me to challenge my own taken-for-granted version of her history. Familiar territory seen from another perspective suddenly seems perturbing. As psychiatrists, too often we are drawn into seeing people through a lens of illness, as if this was their only identity.A" Veronica Burton's Psychiatrist Nick Rose in his Postscript

I would recommend each Home purchase a copy-Ian Turner, Chair, Registered Nursing Home Association
Identifies a gap in the sector and offers a practical means of addressing the need.- Des Kelly, OBE, Executive Director, National Care Forum The Care Home Handbook has one aim: to improve the care and wellbeing of residents in care homes. It informs, reminds and refreshes the reader's knowledge, enabling care homes to meet the essential standards of care required of them. Aimed at all nurses and healthcare assistants working in care homes, this invaluable, unique and jargon-free resource will help staff deliver skilful care, prevent poor practice, and build knowledge and confidence when working with older people. Grounded in everyday practice, this handbook promotes professional and person-centred care that is safe, high-quality, caring and compassionate. It features sections on the resident's journey, values and standards, core nursing skills, common clinical conditions, medicines management, infection

The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

Tim Rushby-Smith is six foot two and highly active, with a love of high places and the great outdoors. Three years ago, with a booming garden design and landscaping business and his wife five months pregnant with their first child, Tim fell six metres out of a tree and broke his back, confining him to a wheelchair. As he came to terms with his injury, treatment and rehabilitation, Tim faced an entirely new life, in which suddenly many of life's simplest tasks became monumental challenges. This is Tim's very human story of learning to live with disability, from overwhelming feelings of anger and despair, to learning how to face the future head on, and watching his daughter take her first steps. Emotional but never self-pitying, this is his unflinchingly honest account of how he built a new life; as a man, a husband and a father.

Contains letters, journals, and reminiscences showing the impact of the frontier on women's lives and the role of women in the West.
