The ' Problem-Information-Plan ' approach is one way of tackling issues systematically — there are others which you may prefer to use. These questions should provide you with a starting point to think about issues. Think carefully about how far you should progress an issue and when you need to seek advice from or, in some cases, hand it over to a more experienced branch official or a full time officer.

The black hole information paradox is a puzzle resulting from the combination of quantum mechanics and general relativity. Calculations suggest that physical information could permanently disappear in a black hole, allowing many physical states to devolve into the same state. This is controversial because it violates a core precept of modern physics—that, in principle, the value of a wave function of a physical system at one point in time should determine its value at any other time.
