The great Sonoran Desert, which covers the hottest part of the U.S. Southwest and northwestern Mexico, teems with a surprising abundance of unusual creatures and plant life. While the desert seems to sleep during the hot daylight hours, many animals are actually up and about. But the desert is most active at night.

Take this quiz. The Sonoran Desert has a subtropical climate and receives 3 to 15 inches (75 to 380 mm) of rain per year. Most of it falls during the monsoon season (July–September), when strong, brief thunderstorms bring heavy rain. Lighter winter rainfall occurs in December and January. Frosts are rare.

Although the desert cottontail resembles most other cottontails, its ears are much larger. This grey rabbit with rufous nape and white tail weighs around 2 pounds (900 grams). It is the only cottontail in the Sonoran Desert. The antelope jackrabbit is one of the largest hares in North America, weighing 9 to 10 pounds (4.5 kg).
