IBM Tivoli Storage Manager Implementation Guide

When Tivoli Storage Manager servers share a library, one server, the library manager, controls device operations. These operations include mount, dismount, volume ownership, and library inventory. Other Tivoli Storage Manager servers, library clients, use server-to-server communications to contact the library manager and request device service. Data moves over the SAN between each server and the storage device.

Refer to the appropriate Tivoli Storage Manager Administrator's Guide for more information concerning your specific tape drive. If you compress the data at the client, we recommend that you not use compression at the tape drive. In this case, you might lose up to 10-12% of the tape capacity at the tape media. ...

IBM Tivoli Storage Manager: Performance Tuning Guide ...

Tivoli Storage Manager automatically defines a new FILE library and also defines drives corresponding to the mount limit for the FILE device class. The FILE library name is the same as the device class name. Each drive uses the library name with a numeric suffix. If the mount limit is changed, the number of drives also changes.
