Musculoskeletal Ultrasound Technical Guidelines I. Shoulder

The purpose of this shoulder ultrasound scan is to provide an assessment of the major musculoskeletal structures in the shoulder and assess the rotator cuff. These structures are often involved with symptoms such as pain or restricted movement. They include: Biceps Tendon; Subscapularis; Supraspinatus; Infraspinatus; Acromioclavicular Joint

Shoulder Musculoskeletal Ultrasound Scan - The Scan Clinic

Read Book Ultrasound Of The Shoulder Musculoskeletal Ultrasound Series

Shoulder ultrasound is consistently used in the assessment of the shoulder joint. It is a quick painless ultrasound scan examination and readily available. It is also a dynamic examination unlikely MRI and therefore the muscles, tendon, the rotator cuff and soft tissue can be evaluated in real-time and under movement.

Private Shoulder Ultrasound | Shoulder Scan ...

Ultrasound-guided (USG) procedures of the shoulder are well established for interventional management. Ultrasound provides the advantages of excellent soft tissue resolution, injection accuracy, low cost, accessibility, portability, lack of ionizing radiation, and the ability to perform real-time image-guided procedures.

Ultrasound-Guided Interventional ... - Musculoskeletal Key

10 Sonographic Evaluation of the Shoulder The Shoulder In the hands of a skilled operator, ultrasound is more sensitive than even MRI for the diagnosis of rotator cuff tears. Rotator Cuff Tears Ultrasound MRI Full-thickness tear Sensitivity 94.3% 91.2% Specificity 95.3% 94.2% Partial-thickness tear Sensitivity 79.1% 63.1% Specificity 94.6% 93.7% Overall

Musculoskeletal Ultrasound - Sonosite

Ultrasound of the shoulder (also referred to as the rotator cuff) is an excellent imaging modality for assessment of the tendons, ligaments, muscles and the associated soft connective tissues. If you are experiencing pain, restricted movement of the joint or pain following an injury, musculoskeletal ultrasound is able to evaluate these structures with a comparable accuracy to a MRI scan.
